

How to Create Slidshows in ProShow

By Karen Reynolds

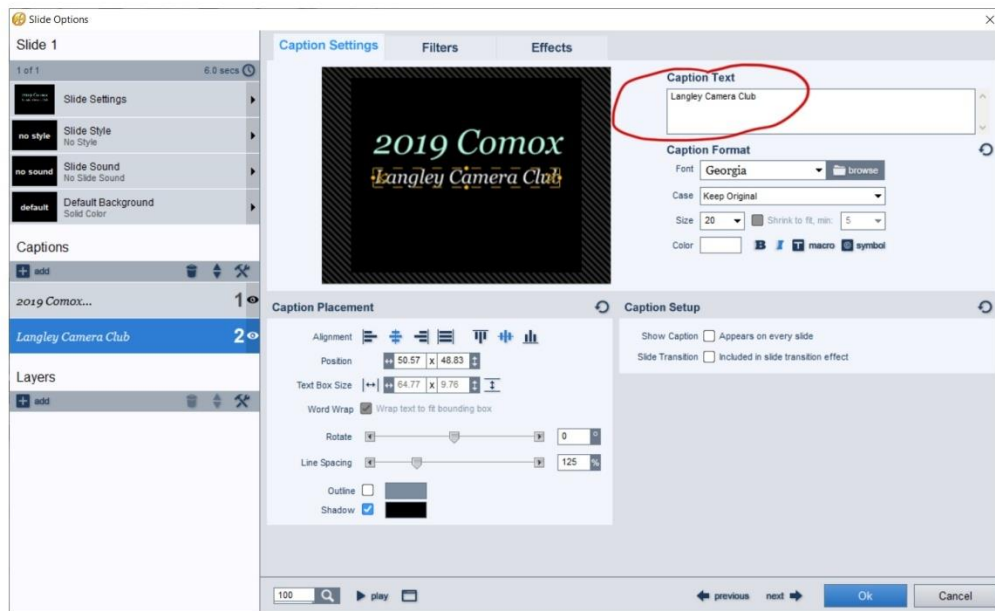

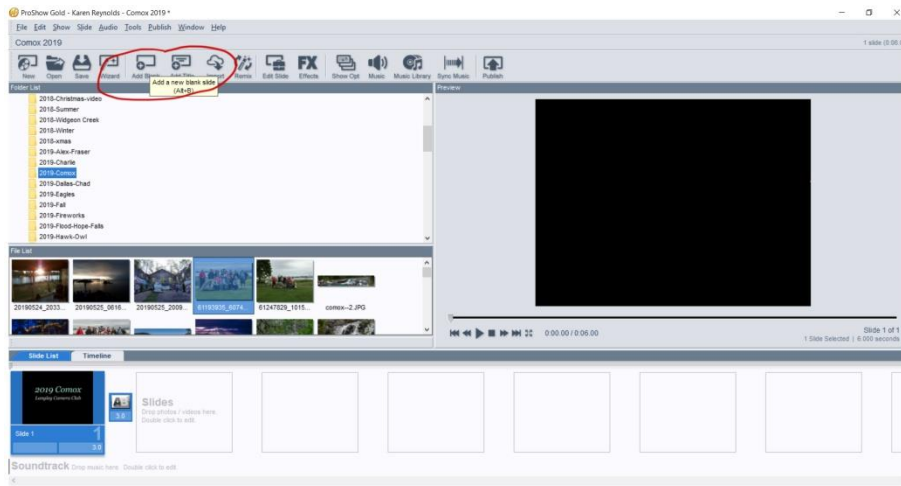

Development Night October 16, 2019

Proshow Gold

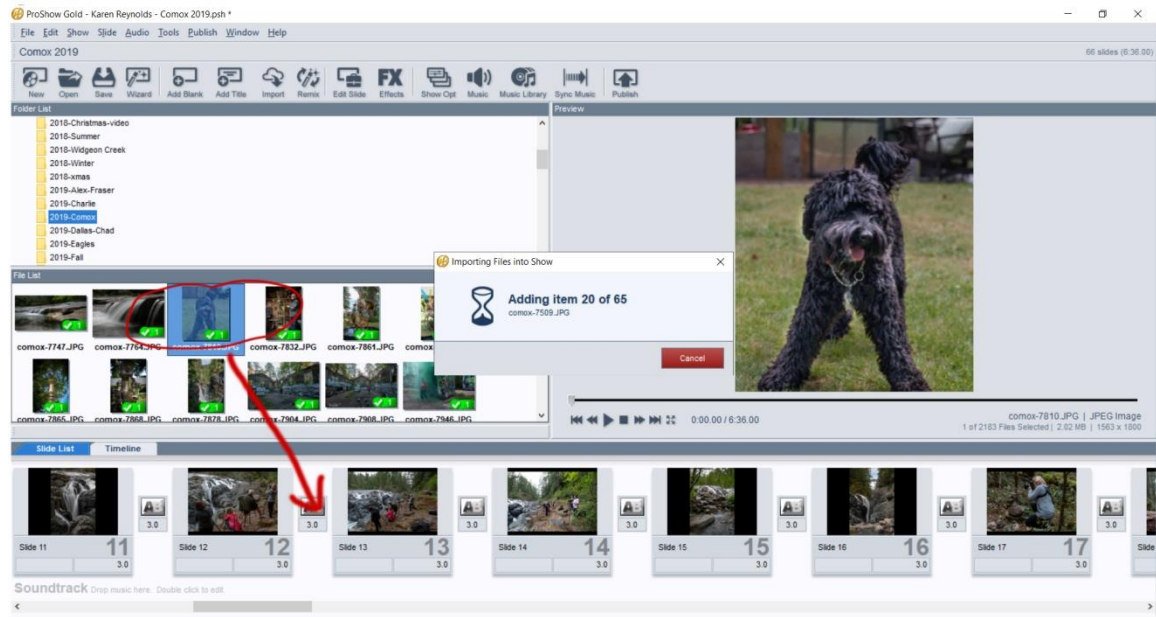

- 1) Open Proshow, Start a New Show or Open Existing. Fill in a Title for your show and Add a “Blank Show” or click on the “Wizard” to start a new show. Click CREATE

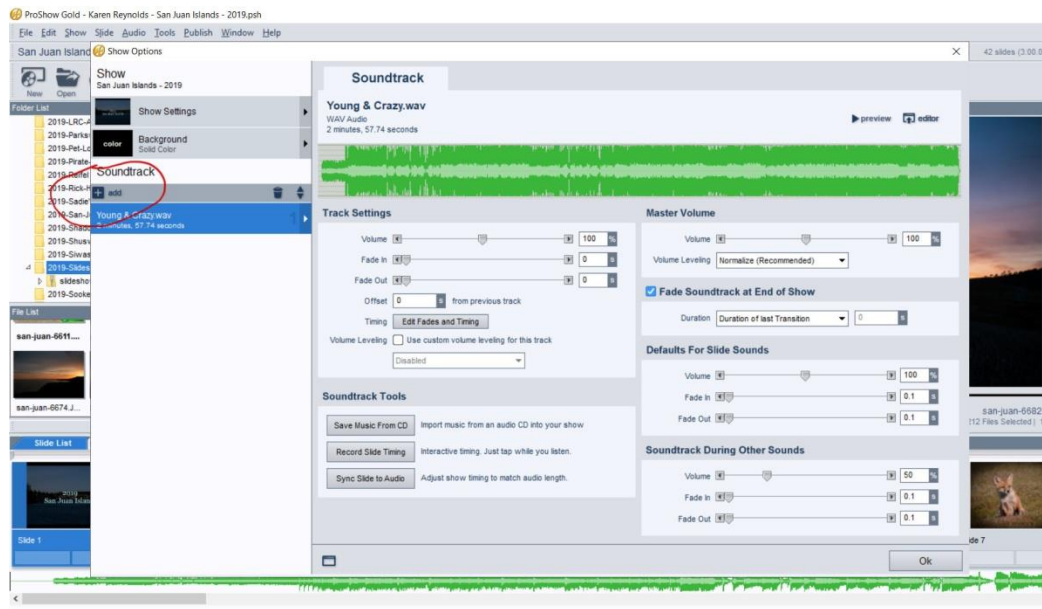

- 2) Add a Title or Blank Slide to start. Add a CAPTION change the colour, font, add an outline, shadow, background colour, ect and click OK.

- 3) Find folder with pictures. Drag them onto the timeline either one at a time or all at once

- 4) Save your project periodically so you don't lose anything
- 5) Move pictures around timeline (CTRL X – removes them, CTRL V – pastes them back in) or add more pictures
- 6) Add music – from computer, library, or media . You can adjust fading in and fading out or overlapping multiple songs. To overlap songs view this link <https://www.youtube.com/watch?v=oNQoeLRErgw>
Songs can be downloaded from Youtube and converted using this link <https://youtube-mp3.net/>

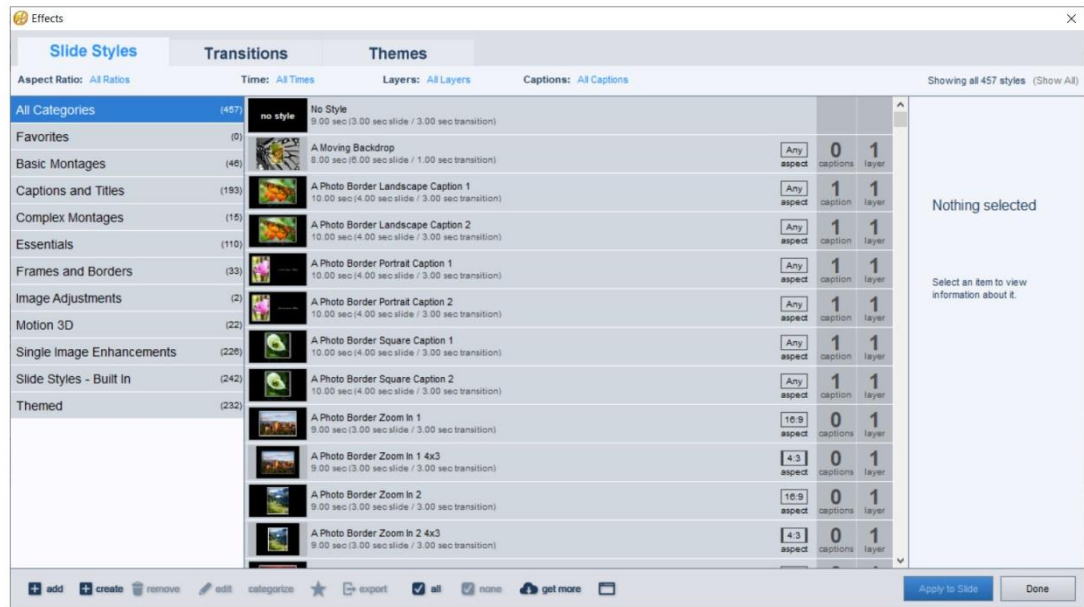

- 7) You can apply transitions and set the time it takes to fade to the next slide (transitions can be accessed by clicking on the square box between each picture)

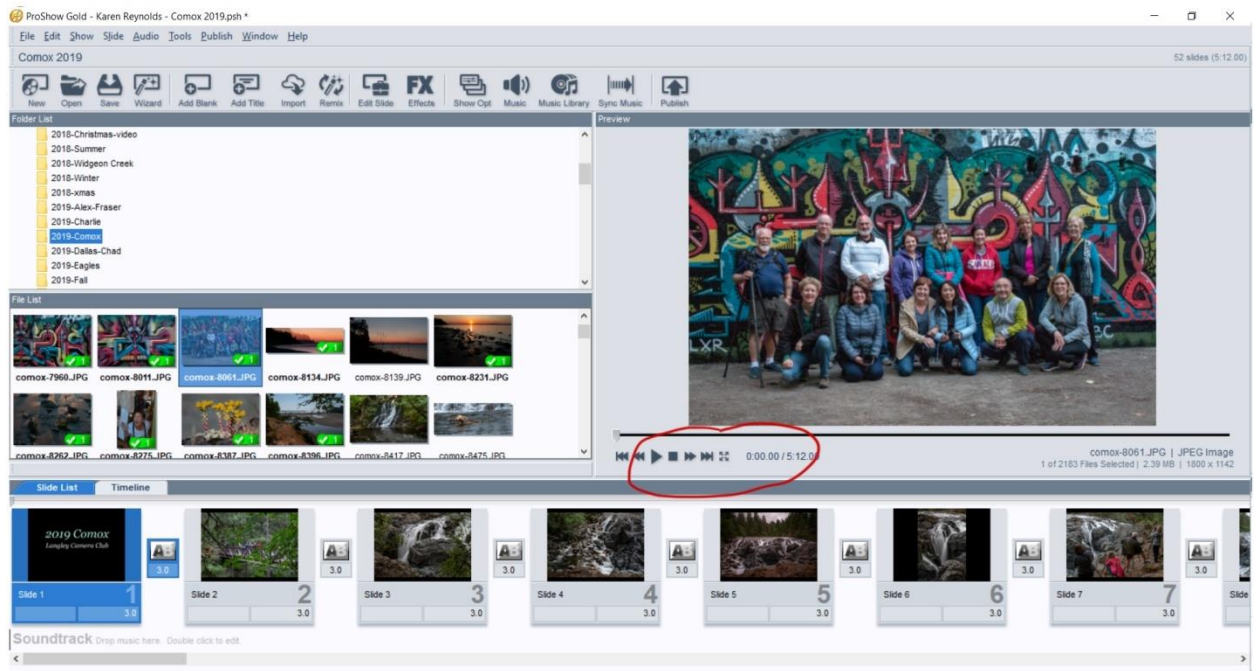

- 8) Look at time – how does it fit with the number of pictures. Apply FX effects for individual slides or combine a few together. Select an FX depending on how many layers you want, or if it's for a

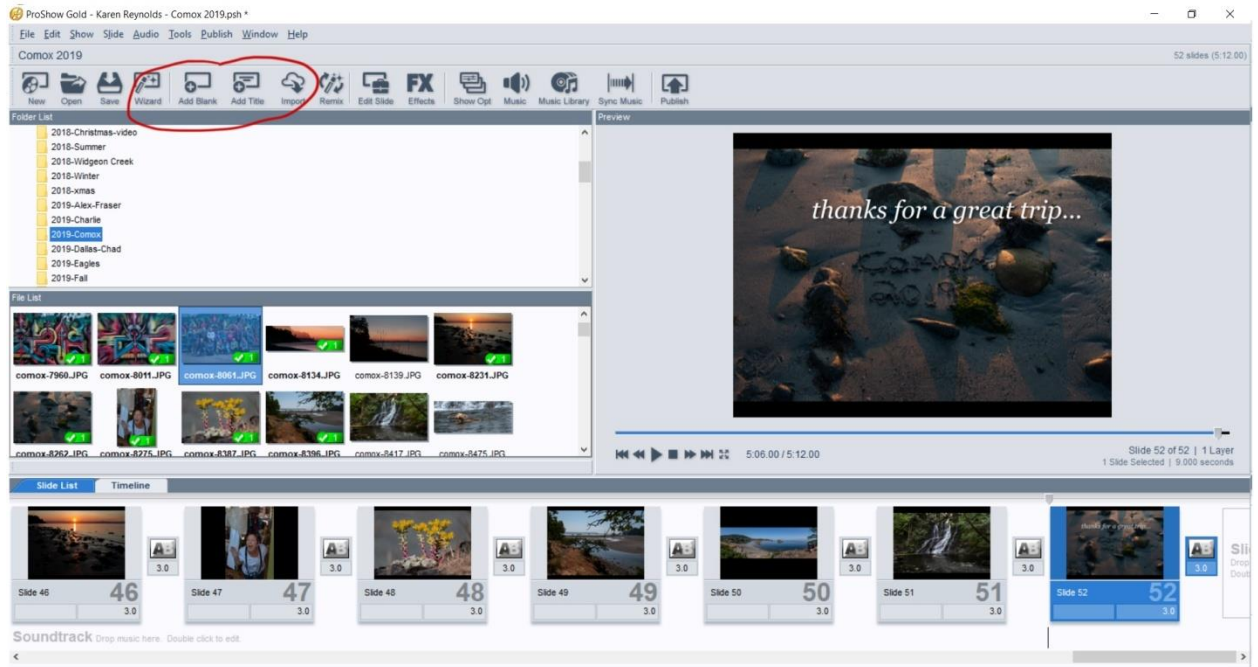

specific theme

9) Play the slideshow to get a feel for speed and make adjustments. Keep saving your project

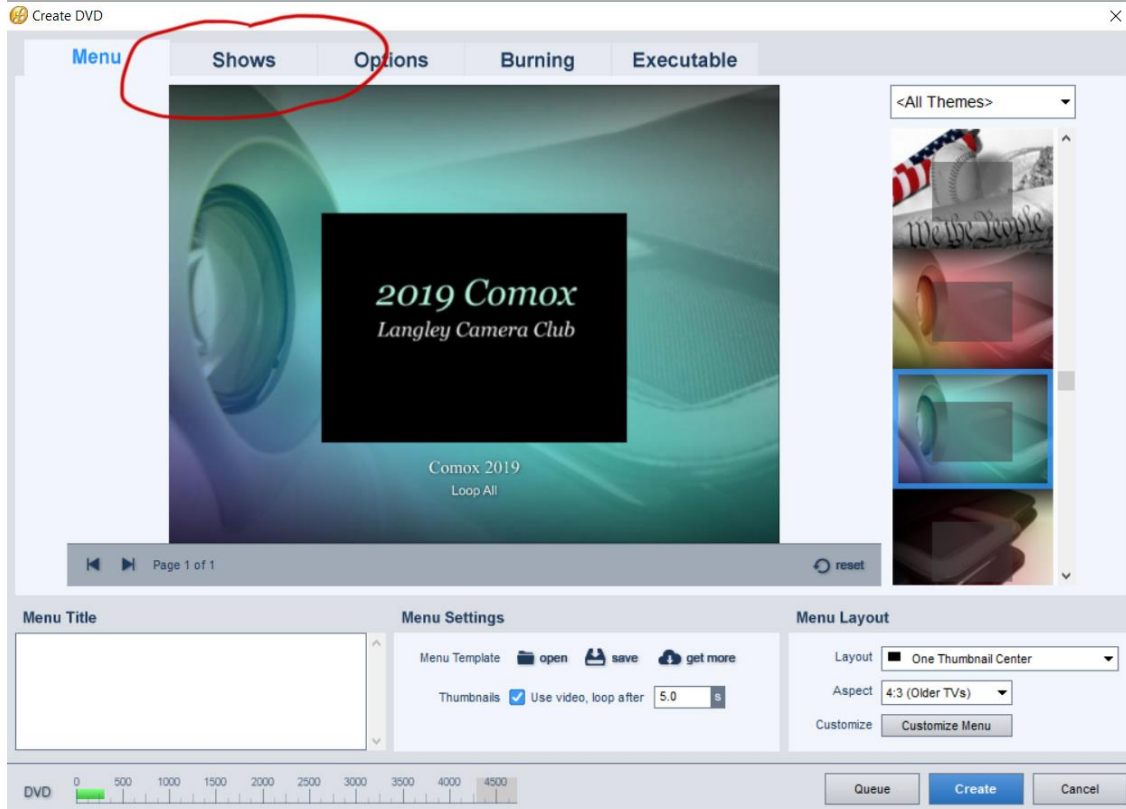

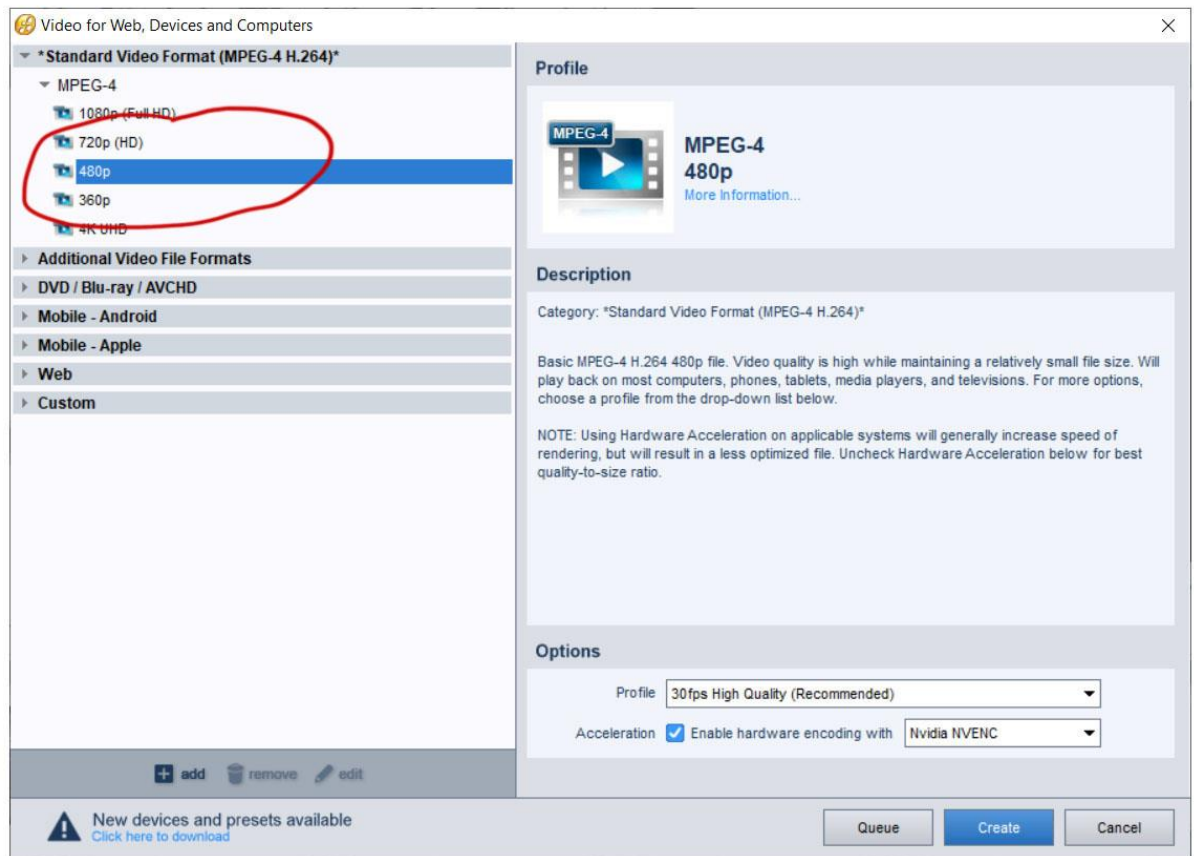

10) Add a blank Slide or Title to end the show. Or you can add a FX slide or background for a more interesting ending

- 11) Publish the show. You have a few choices. I use Video file (select quality & create) , or a DVD (you can choose a background, aspect ratio, Title) I have found the You tube link doesn't work very well – I find it's better to do a video file and then upload to youtube .

12) Another way to save is called Collecting. The show files save all files used in the show in 1 folder.
You can access this through Tools

Here's some more information on other formats:

How to make a slideshow using Pecha Kucha <https://www.youtube.com/watch?v=l9zxNTpNMLo>
