www.tamron.ca › Accessories › TAP-in Console

Updates software in lens. Useful if switching from DSLR to mirrorless. Also you can adjust the focus on it so that it's not back focussing or front focussing.

\$59 and up online

Expodisk

www.expodisc.com

Sets a very accurate white balance. This measures all the light coming towards your subject not just a small area like a grey card. You put it over the front of your lens and shoot backwards from your subject to where you'll be standing. And then take a picture. Then you put that picture into your user mode settings, or you can just take the picture and import it into your computer however you import your files and use that as your white balance setting for all the photos you took from that exact location.

Sheena Wilkie:

Lensbaby lenses and optics

www.lensbaby.com

Detailed information on various lenses and optics on website. Prices vary

Bill Kellett:
